The California Art Council has awarded a small grant to the City of Scotts Valley for planning the Art Walk. The Scotts Valley Arts Commission is guiding this work, with City staff support.

With strong community support, the Art Walk could be an annual event, with different artwork displayed each year. Our plan is to display several pieces of art. As funds are raised (with your donations), we could expand the Art Walk to include additional art pieces.

For a convenient, cohesive experience we will place the pieces of art within easy walking distance, from the Performing Arts Center, Community Center, Senior Center, Skate Park and near Skypark Recreation Building.

The Commission will invite artist's applications to select artwork to be displayed for the Art Walk. The Commission has the support of the City Council for this project.

Funds are needed for:

- Compensation of the artist's costs for transport, installation, and insurance of art pieces
- Opening and closing celebrations
- Coordination and operation expenses

We are looking to raise money for a matching grant with both cash and in-kind contributions, for future ArtWalk exhibits.

Support the Arts

Art is a natural everyday part of life. We draw upon many forms of art to express ourselves, and to benefit from the expressions of others. Art helps us to achieve better self-awareness, develop critical thinking skills and communicate across cultural and generational diversities.

*Located at the Community Center

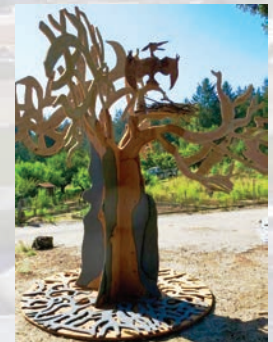

6. What Makes a Tree

Sculpture
by Joe Cosentino

A collaborative sculpture
designed for young
artist to voyage through
the journey from line to
shape to form.

www.hillshadestudio.com
*Located at the Library

7. Into the Wind

Sculpture
by Pierre Riche

What inspired me to
sculpt this pose was the
idea of a man battling a
strong wind. I wanted it
to give the feeling that
the wind was so strong
that the metal man is
almost being blown
away but somehow he is
barely hanging in there.
Surviving our challenges
makes us stronger.
